## Let's Talk Bees!

Come and learn about bees - how important they are to us and how essential they are to our ecosystem. Bees allow plants to reproduce through pollination; these plants contribute to our food system.

*New Jersey Woodland Stewards Program*

Tuesday, July 21, 2020

7:00 pm

Burlington County Lyceum of History  
and Natural Sciences

307 High Street

Mount Holly NJ 08060

## Invasive, Native, or Naturalized - that is the question!

We will discuss the nature of invasive plants. Why we should care about them and what they do to our environment? What we can do about them?

*The New Jersey Woodland Stewards Program is an educational and outreach program for those who love and speak for the woods. It promotes sustainable stewardship of our natural resources through scientifically based forest and wildlife management practices.*

Free Admission / Refreshments served
